All prices include local delivery during normal business hours, assembly and set-up as well as propane and the necessary tank. Plus, with Lava Heat, you get a one-of-a-kind product that combines elegant outdoor lighting with comfortable and soothing heat:

- ◆ Lava Heat Italia flame heaters are equipped with an easy-light ignition. The enclosed burner prevents flash over by encasing loose gas inside the glass tube, not in the open surrounding air.
- ◆ Lava Heat Italia burners are encased in a glass tube that protects burner components from harmful conditions. The ceramic burner is corrosion resistant and reduces blockages.
- ◆ Most Lava Heat Italia patio heaters have flame/heat adjustment settings which allow you to control the height of the flame and heat as well as to conserve gas.
- ◆ Many Lava Heat Italia heater designs heat in a 360 degree pattern along a vertical heating element, heating the entire body comfortably with a balanced heat.
